## BCT Members

As a follow up to April 2016 ST012 slide presentation, Slide 32 which depicted the LSZ potentiometric surface map was revised and replaced with the attached figure. The reason for the revision is that ST012-W37 was not used for the LSZ potentiometric surface map due to LNAPL presence which prevented an accurate reading of the existing water level. Additionally, ST012-W37 is not critical for the determination of the LSZ potentiometric surface.

D.R. Smallbeck
